Imported from Rogow, Poland, and produced by WBP, the Jack AK47 Tactical B5 Rifle

combines solid features with a tactical edge. WBP, a Polish firearms manufacturer, supplies parts and firearms to police, military, and civilian shooters worldwide. This Jack Tactical B5 rifle is chambered in 7.62x39 and operates semi-automatically, accommodating a variety of Kalashnikov-pattern magazines and drums. The barrels, provided by FB Radom, a key Polish military supplier, are hammer-forged and chrome-lined, ensuring long-term durability and superb accuracy.

The rifle features a HuxWrx Suppressor mount, which allows for the attachment of HuxWrx/OSS suppressors, such as the Helix 762 HD QD or the Flow 762 K (sold separately). This mount has been installed and aligned by the expert team at Atlantic Arms MFG to ensure safe and effective use with your suppressor. Additionally, the rifle includes a HuxWrx Blastphemy Blast Deflector for situations when a suppressor is not in use, directing the blast and pressure away from you and nearby individuals.

Other notable features include the B5 Mil-Spec Bravo Stock, TDI Arms ERG Pistol Grip, TDI Arms AKS-T Buffer Tube, TDI Arms AKML M-LOK Lower handguard, and a Cheese Grater Style Upper handguard. These components provide quick stock length adjustments and make the rifle versatile for adding personal accessories like lights, lasers, and foregrips via the M-LOK handguard. The rifle also boasts factory serial numbers on most major parts and a Polish Eagle on the sight block, enhancing its collectibility and resale value. If you seek an AK rifle with classic aesthetics, modern functionality, and exceptional quality, this may be the ideal choice. It includes one 30-round AK47 magazine. US 922 R parts include the Pistol Grip, Muzzle Brake, Gas Piston, and Magazine.
