WBP, located in Rogów, Poland, is now providing AK barrels for U.S. enthusiasts looking to upgrade their favorite rifles or DIY kits. Renowned for their superior AKM-AK47 firearms, WBP is broadening its selection of components. Each barrel is crafted with button rifling on advanced precision gun drilling machinery, guaranteeing exceptional quality. The barrels undergo gas nitriding treatment both internally and externally, enhancing corrosion resistance, strength, durability, and longevity. Additionally, every WBP barrel is rigorously tested using a Zeiss CMM, air gauging, and endoscopic inspections to ensure top-notch performance.
