WBP's AK47 parts kits, crafted in Rogów, Poland, are among the finest components available for your next build project. These are the same high-quality parts found in the renowned WBP AK47 Jack series of rifles and pistols. The kit includes a forged trunnion, a machined and heat-treated bolt and carrier, with all components undergoing quality checks using a Zeiss coordinate measuring machine. Each part features a striking black finish and comes neatly packaged with a signed WBP inspection checklist. This comprehensive kit includes everything you need to complete your AK build, down to the rivets—all you'll need to add are a barrel, stock set, and receiver! Atlantic offers a wide selection of AK stock sets, barrels, and receivers for you to choose from.
