[WBP Jack 556SR](#) AK47 Classic rifle is imported from Rogow Poland and manufactured by WBP. It has rock-solid features. WBP, a Polish-based firearms company that supplies parts and firearms for Police, Military and Civilian shooters around the world. The Jack rifle is chambered in semi-auto .556 and takes a variety of .556/.223 [AK 47](#) mags. Developed by request from US AK shooters that wanted an alternative caliber to shoot with readily available US made ammunition. These rifles are elegant with Old School styling and modern quality control and accuracy. They have a beautiful Polish laminate stock set and a deep black metal finish. For added collectability and resale, the rifle has factory serial numbers on all major parts. The sight block also features the Polish Eagle on its left side. This rifle is a great choice if you're looking for an AK rifle that has Old School quality and style. Includes 1-30 rounds .556/223 Magazine.

The WBP Jack 556SR Rifle featuring the Definitive Arms DAG-13, 13 position adjustable, gas block is a result of input and requests from customers that loved the Classic Jack Rifles but wanted the ability to tune the gas system to their ammunition, suppressor, mission specific needs or personal preference for recoil management.

The DAG-13 is a restrictive gas adjustment system, that does not vent extra gas. It will prevent surplus gas from getting into the gas system and action, resulting in cleaner operating system and better sound reduction while shooting suppressed. There are also accounts that the DAG-13 may improve accuracy by reducing amount of gas impingement inside of block on low settings. The DAG-13 system is unique in the way it utilizes \*only\* one additional part over a 100 Series gas block and is extremely reliable with no fine parts that will wear out.

The sight radius on these rifle is also reduced on by using the DAG-13 combination part. This yields an rifle with a lighter, more maneuverable front end. While maintaining the accuracy of the full barreled rifle and increasing reliability. Another great feature of this rifle is the custom detent collar at the end of the barrel. This part captures standard Kalashnikov muzzle devices, threaded 14mmx1 LH, that usually lock in place with a spring loaded pin. Ultimately, allowing the user to use variety of muzzle devices or Kalashnikov pattern suppressors like the Dead Air PBS-1 Wolverine.

US 922 R parts include pistol grip, muzzle brake, gas piston and magazine.

Please Note: The WBP rifle is designed to produce optimum accuracy utilizing 5.56x45 ammunition.
