Imported from Rogow Poland and manufactured by WBP & WBP USA the Jack 762SC

rifle offers rock solid features. [WBP](#) is a Polish based firearms firm supplying parts and firearms to Police, Military and Civilian shooters all over the globe. The Jack rifle is chambered in 762x39 semi auto and accepts a wide variety of mags and drums. These are beautiful rifles with Old School styling and look like an AK should look with gorgeous laminate stock set and deep rich black metal finish. The barrels are supplied by [FB Radom](#) the Polish Military supplier and are hammer forged and chrome lined yielding years of service and fantastic accuracy. The rifle sports factory serial numbers on most major parts and the Polish Eagle on the left side of the sight block for added collectability & resale value. If you are looking for an AK rifle with Old School style and quality this may be the perfect rifle! Comes with 1-30 round [AK 47](#) Magazine.

The WBP Jack 762SC Rifle featuring the Definitive Arms DAG-13, 13 position adjustable, gas block is a result of input and requests from customers that loved the Classic Jack Rifles but wanted the ability to tune the gas system to their ammunition, suppressor, mission specific needs or personal preference for recoil management.

The DAG-13 is a restrictive gas adjustment system, that does not vent extra gas. It will prevent surplus gas from getting into the gas system and action, resulting in cleaner operating system and better sound reduction while shooting suppressed. There are also accounts that the DAG-13 may improve accuracy by reducing amount of gas impingement inside of block on low settings. The DAG-13 system is unique in the way it utilizes *only* one additional part over a 100 Series gas block and is extremely reliable with no fine parts that will wear out.

The sight radius on these rifle is also reduced on by using the DAG-13 combination part. This yields an rifle with a lighter, more maneuverable front end. While maintaining the accuracy of the full barreled rifle and increasing reliability. Another great feature of this rifle is the custom detent collar at the end of the barrel. This part captures standard Kalashnikov muzzle devices, threaded 14mmx1 LH, that usually lock in place with a spring loaded pin. Ultimately, allowing the user to use variety of muzzle devices or Kalashnikov pattern suppressors like the Dead Air PBS-1 Wolverine.

US 922 R parts will be pistol grip, muzzle brake, magazine and gas piston.

Optic and Mount NOT included
